Subject Index to Volume 19

Acute renal failure, hemodialysis in, amino acid loss in, 15
Albumin
  intravenous, as adjunctive therapy, in hypoalbuminemia, 166
  synthesis of, down-regulation of, by interleukin-1â or turpentine, 257 (editorial), 266
Alcoholic hepatitis, malnutrition in, diagnosis and treatment of, 258
American Society for Parenteral and Enteral Nutrition
  19th Clinical Congress, program summary and abstracts from, 1S-26S (Jan-Feb supplement)
  definition of terms for, 1
Amino acids
  branched-chain, decreased whole-body proteolysis with, 47
  in cancer patients, with enteral vs. parenteral nutrition, 204
  in gastrointestinal surface protection, 410
  hepatic transport of, endotoxin-induced increase in, ketorolac abrogation of, 9
  infusion kinetics of, for whole body energy and nitrogen balance, after major surgery, 333
  intestinal, in critically ill patients, 272
  loss of in hemodialysis, 15
  plasma, normalization of, by recombinant human growth hormone, 137
Amino acid–vitamin solution, hepatic response to, light exposure and, 398
Antibiotics, for catheter-related infections, 428 (letter)
Anticoagulation, for thrombophlebitis prevention, 507
Antitumor necrosis factor antibodies, in reduction of hepatic steatosis, 80
Arginine
  metabolic effects of, in healthy elderly, 227, 329 (erratum)
  metabolism of, nitric oxide synthesis and, 234
A.S.P.E.N. nutrition guidelines, NASPGN commentary on, 255
Aspiration pneumonia, gastroesophageal reflux in gastrostomy feeding and, 172

Bacterial translocation
  enteral nutrition and, 156
  TPN-induced sympathetic activation and, 419
Bone remineralization, with vitamin D withdrawal, 431
Book reviews
  Applied Nutrition and Diet Therapy for Nurses (Davis & Sherer), 422
  Enteral Nutrition (Borlase et al), 248
  Mayo Clinic Diet Manual and Handbook of Nutrition Practices (Nelson et al), 423
  Nutritional Assessment and Support (Hardin & Melnik), 91
  Nutritional Assessment of Elderly Populations (Rosenberg), 425
  Nutritional Care for High Risk Newborns (Groh-Wargo, Thompson & Cox), 90
  Nutritional Toxicology (Kotsonis, Mackey & Hjelle), 330
  Nutrition and Hydration in Hospice Care (Gallagher-Allred & Amenta), 330
  Obesity: Pathophysiology, Psychology, and Treatment (Blackburn & Kanders), 248
  Obesity in Europe 93: Proceedings of 5th European Congress on Obesity (Ditschuneit et al), 424
  Organ Metabolism and Nutrition: Ideas for Future Critical Care (Kinney & Tucker), 90
  Pediatric Enteral Nutrition (Baker, Baker & Davis), 422
  Protein Metabolism in Infancy (Raiha), 423
  Renal Ammoniagenesis and Interorgan Cooperation in Acid-Base Homeostasis (Tizianello et al), 331
Bowel. *See under* Colon; Intestinal; Small bowel
Brain, manganese deposition in, during long-term TPN, 310
Burns
  heart rate and metabolic response in, 55
  low-fat nutrition support in, 482
Butyrate, effect of on colonic mucosal release of prostaglandin E_2, 182
Butyric acid production, soy oligosaccharide fiber and, 63

Cachectin/tumor necrosis factor, distribution and uptake of, 341
Calorie restriction, in obese patients, 251, 252 (letters)
Cancer, amino acid levels in, with enteral vs. parenteral nutrition, 204
Cardiopulmonary protein synthesis, with chronic oral/IV feeding, 107
Casein, vs. casein hydrolysate, in malnutrition/malabsorption, 216
Catecholamines, elevated, diet, bacterial translocation, and IV line and, 419
Catheter(s)
  central venous
    damage to by power injection of contrast media, 428 (letter)
    occlusion of
      clinical signs as indicators of, 75
      ethanol and hydrochloric acid for, 416
    silicone rubber, hydrochloric acid damage to, 407
  peripherally inserted central, retrospective study of, 133
Catheter-related infections
  catheter site and type and, 250, 251 (letters)
  conservative management of, 428 (letter)
  spinal osteomyelitis after, 291
Cecal resection, colonic adaptation after, fiber fermentation in, 100
Central catheters. *See* Catheter(s)
Chemically defined structured lipid emulsions, effects of on reticuloendothelial function and lung and liver morphology, 33
Cholecystectomy, infusion kinetics of substrates and amino acids, for whole body energy and nitrogen balance, 333
Chronic renal failure, catch-up growth in, with long-term enteral nutrition, 175
Cirrhosis, hepatic, thiacetamide-induced, recovery from with long-chain polyunsaturated fatty acids, 461
Colon, prostaglandin E_2 release and cell proliferation in, deoxycholic acid and butyrate effects on, 182
Colonic adaptation, after cecal resection, fiber fermentation in, 100
Contrast media, power injection of, catheter damage from, 428 (letter)
Copper-induced lipid peroxidation, in newborns, 373
Corticosteroids
  immune suppression with, improvement of with insulin-like growth factor-I, 444
  inhibition of pulmonary microvascular endothelial glutamine transport by, 477
Crohn's disease, enteral nutrition in, 93 (editorial)
  practical aspects of, 365
  remission induction by, 356
  total, 93 (editorial), 95
Cyclo-oxygenase blockade, abrogating increased hepatic amino acid transport in endotoxemia, 9

Definition of terms
  A.S.P.E.N.-approved, 1
  suggested improvements in, 92, 250 (letters)
Deoxycholic acid, effect of on colonic mucosal release of prostaglandin E_2, 182
Dexamethasone
  immune suppression with, improvement of with insulin-like growth factor-I, 444
  inhibition of pulmonary microvascular endothelial glutamine transport by, 477
Dialysis, amino acid loss in, 15
Diet, TPN-induced sympathetic activation and, 419
Dietary fiber. *See* Fiber
Dietary modifications, for short bowel syndrome, 296
Dodecanedioic acid, pharmacokinetics of, 498
Drug metabolism, hepatic, TPN-induced decrease in, 303

Elderly, arginine metabolic effects in, 227, 329 (erratum)
Endotoxemia. *See also* Sepsis
  gut atrophy prevention and intestinal protection in, by insulin-like

  suggested improvements in, 92, 250 (letters)
Deoxycholic acid, effect of on colonic mucosal release of prostaglandin E_2, 182
Dexamethasone
  immune suppression with, improvement of with insulin-like growth factor-I, 444
  inhibition of pulmonary microvascular endothelial glutamine transport by, 477
Dialysis, amino acid loss in, 15
Diet, TPN-induced sympathetic activation and, 419
Dietary fiber. *See* Fiber
Dietary modifications, for short bowel syndrome, 296
Dodecanedioic acid, pharmacokinetics of, 498
Drug metabolism, hepatic, TPN-induced decrease in, 303

Elderly, arginine metabolic effects in, 227, 329 (erratum)
Endotoxemia. *See also* Sepsis
  gut atrophy prevention and intestinal protection in, by insulin-like

growth factor-I, 119
ileal permeability changes in, luminal glutamine perfusion altering, 83
increased hepatic amino acid transport in, cyclo-oxygenase blockade abrogation of, 9
Endotoxin
inhibition of pulmonary microvascular endothelial glutamine transport by, 477
translocation of, hepatic steatosis and, 80
Energy, whole body, infusion kinetics of substrates and amino acids for, after major surgery, 333
Energy equation, usefulness of, 426 (letter)
Energy expenditure, in critically ill patients, 426 (letter)
Enteral nutrition
bacterial translocation and, 156
in cancer patients, amino acid levels with, vs. with parenteral nutrition, 204
cardiopulmonary protein synthesis and, 1-7
in Crohn's disease, 93 (editorial), 95, 356, 365
fiber supplementation in, bowel function and, 63
long-term, catch-up growth in chronic renal failure with, 175
tube placement for
intraoperative nasoenteric, 239
jejunal, in percutaneous endoscopic gastrojejunostomy, 239, 329 (erratum)
via gastrostomy tube, gastroesophageal reflux and, 172
via percutaneous gastrostomy, malabsorption and villous atrophy and, 193
Errata, 329
Esophageal cancer, amino acid levels in, with enteral vs. parenteral nutrition, 204
Essential fatty acid levels, long-term home parenteral nutrition and, 286
Ethanol, for central venous catheter occlusion, 416

Fasting, reduction of intestinal reperfusion injury by, 127
Fat, in nutritional support, for burn patients, 482
Fat-free mass estimation, in HIV infection, 28
Fat oxidation, whole body, structured vs. long-chain triglycerides and, 381
Fatty acids
essential, long-term home parenteral nutrition and, 286
polyunsaturated long-chain, recovery from thiacetamide-induced cirrhosis and, 461
saturated long-chain, recovery from thiacetamide-induced cirrhosis and, 461
Fatty liver
prevention of, by dual infusion system, 199
tumor necrosis factor antibodies in reduction of, 80
Feeding jejunostomy, transverse Witzel–T-tube, 326
Feeding tube. *See under* Tube
Fiber, fermentation of, colonic adaptation after cecal resection and, 100
Fiber supplementation, of enteral diet, bowel function and, 63
5-Fluorouracil, hepatic metabolism of, protein depletion and, 88
Food and Drug Administration guidelines, 92 (letter)

Gastric emptying rate, of oral rehydration solutions, osmolarity and, 403
Gastric pH, zinc absorption and, 393
Gastroesophageal reflux, in gastrostomy feeding, 172
Gastrointestinal surface protection, lactobacilli-surfactant-amino acid–oat fiber formula for, 410
Gastrojejunostomy, percutaneous endoscopic, jejunal tube placement in, 239, 329 (erratum)
Gastrostomy feeding, gastroesophageal reflux in, 172
Glucocorticoids
immune suppression with, improvement of with insulin-like growth factor-I, 444
inhibition of pulmonary microvascular endothelial glutamine transport by, 477
Glucose metabolism, in critically ill patients, glutamine supplementation and, 470
Glutamate, in critically ill patients, 272
Glutamine
in critically ill patients, 272, 470
effect of on small-bowel mucosa during systemic injury response, 22
luminal perfusion of, altering endotoxin-related changes in ileal permeability, 83
in muscle protein turnover regulation, in sepsis, 279
oral, decreased bacterial translocation and improved survival with, in gut-origin sepsis, 69
protein metabolism and glutathione levels and, 492
pulmonary microvascular endothelial transport of, glucocorticoid and endotoxin inhibition of, 477
for short bowel syndrome, 296
Glutamine-dipeptide supplementation, gut atrophy, disaccharidase enzyme activity, and absorption with, 502
Glutamine synthetase, small bowel, localization of, 179
Glutathione deficiency, glutamine supplementation for, 492
Glyceryl trinitrate, for thrombophlebitis prevention, 507
Growth, catch-up, in chronic renal failure, with long-term enteral nutrition, 175
Growth hormone
effect of on nutritional markers, in immobilized trauma patients, 41
for short bowel syndrome, 296
Growth retardation, ornithine á-ketoglutarate and, 420
Gut-derived sepsis
bacterial translocation and survival in, dietary additive effects on, 319
oral glutamine in, 69
Gut mucosal atrophy
intracellular proteases and, 187
prevention of, by insulin-like growth factor-I, in sepsis, 119

Head injury, immune function modification in, by early nutrition, 387
Head trauma. *See also* Trauma patients
growth hormone effects on nutritional markers in, 41
Heart rate, in burns, metabolic requirements and, 55
Hemodialysis, amino acid loss in, 15
Heparin, for thrombophlebitis prevention, 507
Hepatectomy, partial, lipid accumulation in cirrhotic liver after, 313
Hepatic 5-fluorouracil metabolism, protein depletion and, 88
Hepatic amino acid transport, endotoxin-induced increase in, ketorolac abrogation of, 9
Hepatic cirrhosis
lipid accumulation in, after partial hepatectomy, 313
thiacetamide-induced, recovery from with long-chain polyunsaturated fatty acids, 461
Hepatic drug metabolism, TPN-induced decrease in, 303
Hepatic dysfunction, parenteral nutrition and, 3
Hepatic response to amino acid–vitamin solution, light exposure and, 398
Hepatic steatosis
polyunsaturated long-chain, recovery from thiacetamide-induced cirrhosis and, 461
prevention of, by dual infusion system, 199
tumor necrosis factor antibodies in reduction of, 80
Hepatic transplant, early enteral nutrition in, 437
Hepatitis, alcoholic, malnutrition in, diagnosis and treatment of, 258
High-flux membrane dialysis, amino acid losses in, 15
Home parenteral nutrition, long-term, fatty acid status and, 286
Human growth hormone, plasma amino acid normalization by, 137
Human immunodeficiency virus infection, fat-free mass estimation in, 28
Human recombinant interleukin-1â, albumin synthesis down-regulation and, 257 (editorial), 266
Hydrochloric acid
for central venous catheter occlusion, 416
damage to silicone rubber central venous catheters from, 407
Hydrocortisone, for thrombophlebitis prevention, 507
Hydrophilic central venous catheters, percutaneous insertion of, Seldinger technique for, in newborns, 151
Hyperalimentation, as outmoded term, 92 (letter)
Hypoalbuminemia, adjunctive intravenous albumin in, 166
Hypocaloric TPN, in obese patients, 251, 252 (letters)

Ileal permeability, endotoxin-related changes in, with luminal glutamine perfusion, 83
Immobilized trauma patients, growth hormone effects on nutritional

markers in, 41
Immune function
chemically defined structured lipid emulsions and, 33
in head injury, modification of by early nutrition, 387
insulin-like growth factor-I and, 444
Immunofluorescence, in localization of small bowel glutamine synthetase, 179
Infants. *See* Newborns
Infection. *See* Endotoxemia; Sepsis
Inflammatory bowel disease, nutrition in, 93 (editorial)
Infusion kinetics, of substrates and amino acids, for whole body energy and nitrogen balance, after major surgery, 333
In situ hybridization, in localization of small bowel glutamine synthetase, 179
Insulin-like growth factor-I
enhanced immune response with, 444
in gut atrophy prevention and intestinal integrity maintenance, in sepsis, 119
recombinant human, IV infusion of, altered mental status during, 231
Interleukin-1â, albumin synthesis down-regulation and, 257 (editorial), 266
Intestinal amino acids, in critically ill patients, 272
Intestinal integrity, maintenance of, by insulin-like growth factor-I, in sepsis, 119
Intestinal morphologic and functional changes, with TPN, 453
Intestinal mucosa, ornithine á-ketoglutarate salt–induced changes in, 145
Intestinal reperfusion injury, fasting-induced reduction of, 127
Intestinal transit time, equimolar long-chain and medium-chain triglycerides and, 5
Intestine. *See also under* Colon; Small bowel
Intracellular proteases, small bowel
increased mucosal macromolecular transmission and, 187
in TPN-induced gut mucosal atrophy and increased mucosal macromolecular transmission, 187
Intragastric pH, zinc absorption and, 393
Intravenous albumin, adjunctive, in hypoalbuminemia, 166
Iron, intravenous administration of, in very–low-birth-weight newborns, 114

Jejunal tube placement, in percutaneous endoscopic gastrojejunostomy, 239, 329 (erratum)
Jejunoileal bypass, reversal of, 328
Jejunostomy, transverse Witzel–T-tube feeding, 326

Ketorolac, abrogation of endotoxin-induced increase in hepatic amino acid transport by, 9
Kidney failure
acute, hemodialysis in, amino acid loss and, 15
chronic, catch-up growth in, with long-term enteral nutrition, 175

Lactobacilli, in gastrointestinal surface protection, 410
Large intestine. *See under* Colon; Intestinal
Lean body mass estimation, in HIV infection, 28
Leucine metabolism, in splanchnic region, 209
Light exposure, hepatic response to amino acid–vitamin solution and, 398
Lipid, plasma concentrations of, lipid emulsions and, 369
Lipid emulsions
accumulation of in cirrhotic liver, after partial hepatectomy, 313
chemically defined structured, effects of on reticuloendothelial function and lung and liver morphology, 33
plasma lipid and LP-X concentrations and, 369
Lipid peroxidation, copper-induced, in newborns, 373
Liver. *See also under* Hepatic
fatty
prevention of, by dual infusion system, 199
tumor necrosis factor antibodies and, 80
morphology of, chemically defined structured lipid emulsions and, 33
Liver cirrhosis, thiacetamide-induced, recovery from with long-chain polyunsaturated fatty acids, 461
Liver dysfunction, parenteral nutrition and, 3
Liver transplant, early enteral nutrition in, 437
Long-chain polyunsaturated fatty acids, recovery from thiacetamide-induced cirrhosis and, 461
Long-chain triglycerides, with equimolar medium-chain triglycerides, small bowel transit time and, 5
Low-birth-weight newborns, IV iron administration in, 1114
Low-fat nutrition support, for burn patients, 482
LP-X, plasma concentrations of, lipid emulsions and, 369
Lumbar spine bone mineralization, with vitamin D withdrawal, 431
Lung
morphology of, chemically defined structured lipid emulsions and, 33
protein synthesis in, with chronic oral/IV feeding, 107

Malabsorption, in enteral feeding via percutaneous gastrostomy, 193
Malnutrition
in alcoholic hepatitis, diagnosis and treatment of, 258
hepatic 5-fluorouracil metabolism and, 88
morphometric changes in myocardial microvasculature in, 376
Manganese
cerebral deposition of, during long-term TPN, 310
supplemental, in TPN, 222
Medium-chain triglycerides, with equimolar long-chain triglycerides, small bowel transit time and, 5
Mental status alterations, during IV infusion of insulin-like growth factor-I, 231
Metabolic response, to burns, 55
Mucosal atrophy
intracellular proteases and, 187
prevention of, by insulin-like growth factor-I, in sepsis, 119
Muscle protein turnover, glutamine regulation of, in sepsis, 279
Myocardial microvasculature, morphometric changes in, in malnutrition, 376

Nasoenteric feeding tube, intraoperative placement of, 244
NASPGN commentary, on A.S.P.E.N. nutrition guidelines, 255
Newborns
copper-induced lipid peroxidation in, 373
percutaneous insertion of hydrophilic central venous catheters in, Seldinger technique for, 151
very-low-birth-weight, IV iron administration in, 114
Nitric oxide
in sepsis, 234
synthesis of, arginine metabolism and, 234
Nitrogen, total urinary, urinary urea nitrogen in predcition of, 174 (letter)
Nitrogen balance
growth hormone effects on, in immobilized trauma patients, 41
infusion kinetics of substrates and amino acids for, after major surgery, 333
Norepinephrine levels, diet, bacterial translocation, and IV line and, 419
Nutrition guidelines, A.S.P.E.N., NASPGN commentary on, 255

Oat fiber, in gastrointestinal surface protection, 410
Obesity
hypocaloric TPN in, 251, 252 (letters)
jejunoileal bypass for, reversal of, 328
Oral rehydration solutions, gastric emptying rate of, osmolarity and, 403
Ornithine á-ketoglutarate, growth retardation and, 420
Ornithine á-ketoglutarate salt, mucosal changes with, 145
Osmolarity, gastric emptying rate of oral rehydration solutions and, 403
Osteomyelitis, spinal, after TPN catheter-induced septicemia, 291

Parenteral nutrition
in cancer patients, amino acid levels with, vs. with enteral nutrition, 204
home, essential fatty acid status and, 286
total
cardiopulmonary protein synthesis and, 107
cerebral manganese deposition in, 310
hepatic dysfunction and, 3
hepatic steatosis in, 80
hypocaloric, in obese patients, 251, 252 (letters)
intestinal morphologic and functional changes with, 453
in very–low-birth-weight newborns, iron administration in, 114

Pediatrics. *See* Newborns
Percutaneous endoscopic gastrojejunostomy, jejunal tube placement in, 239, 329 (erratum)
Peripherally inserted central catheters, retrospective study of, 133
pH, intragastric, zinc absorption and, 393
Plasma amino acid normalization, by recombinant human growth hormone, 137
Plasma lipid and LP-X concentrations, lipid emulsions and, 369
Polyunsaturated fatty acids, recovery from thiacetamide-induced cirrhosis and, 461
Portal vein infusion, of valine, fatty liver prevention and, 199
Postoperative whole body energy, infusion kinetics of substrates and amino acids for, 333
Preterm infant, IV iron administration in, 114
Prostaglandin E_2, colonic mucosal release of, deoxycholic acid and butyrate effects on, 182
Prostaglandins, in endotoxin-induced increase in hepatic amino acid transport, 9
Proteases, intracellular small bowel, increased mucosal macromolecular transmission and, 187
Protein, serum, growth hormone effects on, in immobilized trauma patients, 41
Protein depletion, hepatic 5-fluorouracil metabolism and, 88
Protein kinetics, in critically ill patients, glutamine supplementation and, 470
Protein metabolism, glutamine supplementation and, 492
Protein synthesis, cardiopulmonary, with chronic oral/IV feeding, 107
Proteolysis, whole-body, decrease in with branched-chain amino acids, 47
Pulmonary microvascular endothelial glutamine transport, inhibition of by glucocorticoids and endotoxin, 477

Recombinant human growth hormone, plasma amino acid normalization by, 137
Recombinant interleukin-1â, albumin synthesis down-regulation and, 257 (editorial), 266
Reflux, gastroesophageal, in gastrostomy feeding, 172
Rehydration solutions, gastric emptying rate for, osmolarity and, 403
Renal failure
  acute, hemodialysis in, amino acid loss and, 15
  chronic, catch-up growth in, with long-term enteral nutrition, 175
Reticuloendothelial function, chemically defined structured lipid emulsions and, 33
Rhamnose monosaccharide malabsorption, in enteral feeding via percutaneous gastrostomy, 193

Seldinger technique, for percutaneous insertion of hydrophilic central venous catheters, in newborns, 151
Selenium supplementation, effect of on skeletal and cardiac muscle, 351
Sepsis. *See also* Endotoxemia
  gut-derived

    oral glutamine in, 69
  muscle protein turnover in, glutamine regulation of, 279
  nitric oxide in, 234
Septicemia, catheter-induced, spinal osteomyelitis after, 291
Short bowel syndrome, growth hormone, glutamine, and modified diet for, 296
Short-chain fatty acid production, fiber supplementation of enteral diet and, 63
Silicone rubber central venous catheters, hydrochloric acid damage to, 407
Small bowel. *See also under* Intestinal
  intracellular proteases in, increased mucosal macromolecular transmission and, 187
  malabsorption and villous atrophy in, in enteral feeding via percutaneous gastrostomy, 193
  during systemic injury response, with/without glutamine, 22
Small bowel glutamine synthetase, localization of, 179
Small bowel transit time, equimolar long-chain and medium-chain triglycerides and, 5
Soy oligosaccharide, short-chain fatty acid production and, 63
Spinal bone mineralization, with vitamin D withdrawal, 431
Spinal cord injury. *See* Trauma
Spinal osteomyelitis, after TPN catheter-induced septicemia, 291
Splanchnic region, leucine metabolism in, 209
Steatosis, hepatic
  prevention of, by dual infusion system, 199
  tumor necrosis factor antibodies in reduction of, 80
Steroids
  immune suppression with, improvement of with insulin-like growth factor-I, 444
  inhibition of pulmonary microvascular endothelial glutamine transport by, 477
Structured triglycerides, vs. long-chain triglycerides, whole body fat oxidation and, 381
Surfactant, in gastrointestinal surface protection, 410
Surgery
  immune suppression with, improvement of with insulin-like growth factor-I, 444
  infusion kinetics of substrates and amino acids for whole body energy and nitrogen balance after, 333
Sympathetic activation, TPN-induced, diet, bacterial translocation, and IV line and, 419

Terminology
  A.S.P.E.N.-approved, 1
  suggested improvements for, 92, 250 (letters)
Thrombophlebitis, prevention of, heparin, hydrocortisone, and glyceryl trinitrate for, 507
Total parenteral nutrition. *See* Parenteral nutrition, total
Transplant, liver, early enteral nutrition in, 437
Transverse Witzel–T-tube feeding jejunostomy, 326
Trauma patients
  head-injured, immune function modification by early nutrition in, 387
  immobilized, growth hormone effect on nutritional markers in, 41
  plasma amino acid normalization in, by recombinant human growth hormone, 137
Triglycerides
  long- and medium-chain, small bowel transit time and, 5
  structured vs. long-chain, whole body fat oxidation and, 381
Tube feeding. *See* Enteral nutrition
Tube placement
  intraoperative nasoenteric, 239
  jejunal, in percutaneous endoscopic gastrojejunostomy, 239, 329 (erratum)
Tumor necrosis factor, distribution and uptake of, 341
Tumor necrosis factor antibodies, in reduction of hepatic steatosis, 80
Turpentine, albumin synthesis down-regulation and, 257 (editorial), 266

Urinary urea nitrogen, in prediction of total urinary nitrogen, 174 (letter)

Valine, dual-infusion administration of, fatty liver prevention and, 199
Harry M. Vars Research Award, 431
Ventricular muscle, protein synthesis in, with chronic oral/IV feeding, 107
Very–low-birth-weight newborns, IV iron administration in, 1114
Villous atrophy, in enteral feeding via percutaneous gastrostomy, 193
Vitamin D withdrawal, bone remineralization and, 431

Whole body energy, infusion kinetics of substrates and amino acids for, after major surgery, 333
Whole body fat oxidation, structured vs. long-chain triglycerides and, 381
Whole-body proteolysis, decrease in with branched-chain amino acids, 47
Witzel–T-tube feeding jejunostomy, transverse, 326

Zinc absorption, intragastric pH and, 393
